

PRODMASH

Gate system

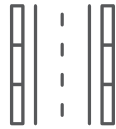

Traffic bypass solution

Traffic flow control and redirection at hard-to-reach areas of a highway or city

Advantages

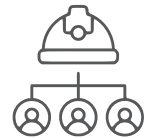

Works in all seasons

No road surface connection

No requirement for special equipment

Bypass organization takes 3 workers and 10 minutes

Can also be delivered semi-assembled

Custom gate length thanks to specifiable modular system [4,5m*/6,5m*]

Ensures safe application for car crashing at speed up to 130 km/h [validated by crash tests]

Usage examples

Modular system allows different types of road traffic re-routing

PRODMASH

Gate system

Traffic bypass solution

Specifications

Containment Level
300-400 kJ

Gate length
4,5 – 31m

Height 1,1m

TR TS 014/2011 Certificate

Width 0,64m

Full-scale tests

Gate system after impact:

Car

Impact velocity 90 km/h

Bus

Impact velocity 67 km/h
