Trailer Truck Mounted Attenuator

Trailer Truck Mounted Attenuator

Lowers car crash aftermath at stationary or slow-moving roadworks.

Guarantees drivers' and road workers' safety.

Protects expensive road vehicles.

1 Part of the pilot car
[Mobile works]

2 Part of the pilot car
[Short/long-term stationary works]

Construction advantage:

1. Truck construction allows impact speed limit to be higher for 20 km/h.

2. Full compliance with GOST R 59291-2021

3. Can be attached to cargo vehicle with standard tow hitch

4. Compact size, product length is 3m

4. Stable and safe trigger regardless of impact vehicle class

5. High anticorrosion performance, every part is coated by hot-dip galvanizing

7. No delay in spare parts delivery or full replacement
